

# Meet the Neighbours

One of the many perks of living close to K-Country is the frequent chance encounters with the diverse abundance of wildlife making their home right in our own backyard.

The winter months are the perfect time to glimpse many different types of birds simply by being alert. Without the dense foliage present throughout the other seasons to block your view, it becomes much easier to spot these winged wonders, perched silently among the tree-tops.

Deer are some of the most common wildlife residents to be found within the hamlet of Bragg Creek, but if you venture slightly further afield into West Bragg Creek and beyond, you will likely meet other inhabitants such as moose, coyotes, Great Horned Owls and bobcats. Bring your camera, especially if you have a telephoto lens, and with a bit of luck and respect for the animals' space, you'll be able to capture their true personalities. They might even pose for you.

Even if you're not off the beaten track, always keep your eyes peeled: You just may encounter a four-legged family meandering down the winding roads. Remember to be especially attentive on the highways in the mountains, where large extended families of Big-Horned Sheep often congregate for a communal salt lick on the recently-plowed roads.

Whatever the time of year, Bragg Creek and Kananaskis is a magical place, made even more so by sharing it with our amazing hairy, furry and feathery neighbours.
